

The 'discover' activity

Discover: purpose and metrics of success

Purpose

The purpose is to ensure **continual alignment** of the product roadmaps and related service offerings with the **needs of service consumers** and with the **organizational strategy**.

Success metrics

- Strategic fit of the organization's products and service offerings.
- Market relevance of the products and service offerings.
- Stakeholder satisfaction with products and service offerings.
- Commercial success of the products (if applicable).

Discover: overview

How the 'discover' activity works:

A continual process, not a one-off, long-interval-based activity

Performed at 3 levels

- Organizational level: vision, strategy, target consumers.
- Portfolio level: optimize portfolio, align with strategy.
- Product level: keep roadmaps and services aligned with consumer needs and strategy.

Influenced by

- PESTLE factors: Political, Economic, Social, Technological, Legal, and Environmental.
- Stakeholder input: customers, shareholders, governing bodies.

Discover: workflow

The high-level workflow of each 'discover' iteration comprises four steps:

ITIL Car Rental | 'Discover'

Anna: ...Marketing research shows growing interest in driverless cars among both our existing and potential customers...

Maria: ...Initial findings show interest but highlight concerns around safety, control, and accountability...

Max: ...our objective is to assess whether these platforms can support real-time data exchange, fleet-level automation, and multilingual AI-driven support.

Anna: Our objective is a safe, reliable, eco-conscious, and fully supported driverless rental experience.
